"Wrong sides, turn, run again, no threads seen."

1. **Run Wrong Sides Together**
   Run your two pieces of stuff together with the wrong sides touching, keeping the edges perfectly even.

2. **Turn At The Seam**
   Turn the work round just at the seam, so the right sides come together inside and the two raw edges are enclosed between.

3. **Run Them Again**
   Run the pieces together again.

4. **Check For Threads**
   See that no threads are visible on the outside.
